

Software Engineering Intern

Remote

Eligibility Criteria

You are a recent graduate or awaiting graduation.

Have some experience building Backend/Android applications that are more than just toy projects.

Applications that have real users or an open source project would be a great plus.

You have a solid foundation in computer science fundamentals, distributed systems, data storage.

Proficiency with at least one mainstream language like Python, Ruby, Java, etc.

Expected Stipend: 50k per month

Batch Eligible: 2023 and 2024
